

Application/Control Number: 09/847,720
Art Unit: 2142

Docket No.: PALM-3629.US.PSI

Amendments To The Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of establishing one of a plurality of network links on a computer system, comprising the steps of:

- a) associating one or more alternative network link designations with one or more of said network links;
- b) requesting a first network link of said plurality of network links;
- c) ~~initiating attempting to initiate~~ said first network link;
- d) determining whether a particular alternative network link designation is associated with said first network link; and
- e) if said step c) fails to establish said first network link and if said particular alternative network link designation is associated with said first network link, ~~initiating attempting to initiate, by said computer system,~~ a particular network link of said plurality of network links based on said particular alternative network link designation.

2. (Original) A method as recited in Claim 1 further comprising the steps of:

- f) determining whether a second alternative network link designation is associated with said particular network link; and
- g) if said step e) fails to establish said particular network link and if said second alternative network link designation is associated with said particular network link, initiating a second network link of said plurality of network links based on said second alternative network link designation.

Application/Control Number: 09/847,720
Art Unit: 2142

Docket No.: PALM-3629.US.PSI

3. (Currently Amended) A method as recited in Claim 1 further comprising the step of:

f) if said step e) fails to establish said particular network link, ~~initiating~~
attempting to initiate, by said computer system, said first network link.

4. (Original) A method as recited in Claim 1 further comprising the step of:

f) if said step e) fails to establish said particular network link, initiating a second
network link of said plurality of network links based on said alternative network link
designation.

5. (Original) A method as recited in Claim 1 further comprising the steps of:

indicating to a user whether said first network link was established; and
enabling said user to discontinue establishment of said particular network link.

6. (Original) A method as recited in Claim 1 wherein said step b) includes:

sending a network open request to a shared library of said computer system.

7. (Original) A method as recited in Claim 1 wherein said computer system comprises a
personal digital assistant.

8. (Currently Amended) A computer-readable medium comprising computer-executable
instructions stored therein for performing a method of establishing one of a plurality of
network links on a computer system, comprising the steps of:

a) associating one or more alternative network link designations with one or
more of said network links;

b) requesting a first network link of said plurality of network links;

c) ~~initiating~~ attempting to initiate said first network link;

Application/Control Number: 09/847,720
Art Unit: 2142

Docket No.: PALM-3629.US.PSI

d) determining whether a particular alternative network link designation is associated with said first network link; and

e) if said step c) fails to establish said first network link and if said particular alternative network link designation is associated with said first network link, ~~initiating~~ attempting to initiate, by said computer system, a particular network link of said plurality of network links based on said particular alternative network link designation.

9. (Original) A computer-readable medium as recited in Claim 8 wherein said method further comprises the steps of:

f) determining whether a second alternative network link designation is associated with said particular network link; and

g) if said step e) fails to establish said particular network link and if said second alternative network link designation is associated with said particular network link, initiating a second network link of said plurality of network links based on said second alternative network link designation.

10. (Currently Amended) A computer-readable medium as recited in Claim 8 wherein said method further comprises the step of:

f) if said step e) fails to establish said particular network link, ~~initiating~~ attempting to initiate said first network link.

11. (Original) A computer-readable medium as recited in Claim 8 wherein said method further comprises the step of:

f) if said step e) fails to establish said particular network link, initiating a second network link of said plurality of network links based on said alternative network link designation.

Application/Control Number: 09/847,720
Art Unit: 2142

Docket No.: PALM-3629.US.PSI

12. (Original) A computer-readable medium as recited in Claim 8 wherein said method further comprises the steps of:

indicating to a user whether said first network link was established; and
enabling said user to discontinue establishment of said particular network link.

13. (Original) A computer-readable medium as recited in Claim 8 wherein said step b) includes:

sending a network open request to a shared library of said computer system.

14. (Original) A computer-readable medium as recited in Claim 8 wherein said computer system comprises a personal digital assistant.

15. (Currently Amended) A computer system comprising:

a data bus;

a processor ~~couples~~ coupled to said data bus; and

a memory device coupled to said data bus and having computer-executable instructions stored therein for performing a method of establishing one of a plurality of network links on said computer system, comprising the steps of:

a) associating one or more alternative network link designations with one or more of said network links;

b) requesting a first network link of said plurality of network links;

c) ~~initiating~~ attempting to initiate said first network link;

d) determining whether a particular alternative network link designation is associated with said first network link; and

Application/Control Number: 09/847,720
Art Unit: 2142

Docket No.: PALM-3629.US.PSI

e) if said step c) fails to establish said first network link and if said particular alternative network link designation is associated with said first network link, ~~initiating attempting to initiate, by said computer system,~~ a particular network link of said plurality of network links based on said particular alternative network link designation.

16. (Original) A computer system as recited in Claim 15 wherein said method further comprises the steps of:

f) determining whether a second alternative network link designation is associated with said particular network link; and

g) if said step e) fails to establish said particular network link and if said second alternative network link designation is associated with said particular network link, initiating a second network link of said plurality of network links based on said second alternative network link designation.

17. (Currently Amended) A computer system as recited in Claim 15 wherein said method further comprises the step of:

f) if said step e) fails to establish said particular network link, ~~initiating attempting to initiate, by said computer system,~~ said first network link.

18. (Original) A computer system as recited in Claim 15 further comprising the step of:

f) if said step e) fails to establish said particular network link, initiating a second network link of said plurality of network links based on said alternative network link designation.

19. (Original) A computer system as recited in Claim 15 wherein said method further comprises the steps of:

Application/Control Number: 09/847,720
Art Unit: 2142

Docket No.: PALM-3629.US.PSI

indicating to a user whether said first network link was established; and
enabling said user to discontinue establishment of said particular network link.

20. (Original) A computer system as recited in Claim 15 wherein said step

b) includes:

sending a network open request to a shared library of said computer system.

21. (Original) A computer system as recited in Claim 15 wherein said computer system
comprises a personal digital assistant.

22. (Currently Amended) A computer system comprising;

a data bus;

a memory device coupled to said data bus; and

a processor coupled to said data bus, wherein the processor is configured to attempt to initiate a first network link of a plurality of network links ~~is initiated~~ in response to a request for said first network link, and wherein if said first network link is not established and if a user has previously designated an alternative network link for said first network link, said processor is further configured to attempt to initiate said alternative network link ~~is initiated~~.

23. (Original) A computer system as recited in Claim 22 wherein if said alternative network link is not established, a second alternative network link previously designated by said user is initiated.

24. (Original) A computer system as recited in Claim 22 wherein if said alternative network link is not established, said first network link is initiated.

Application/Control Number: 09/847,720
Art Unit: 2142

Docket No.: PALM-3629.US.PSI

25. (Original) A computer system as recited in Claim 22 wherein whether said first network link was established is indicated to said user, and wherein said user is enabled to discontinue establishment of said alternative network link.
26. (Original) A computer system as recited in Claim 22 wherein said request is sent to a shared library of said computer system.
27. (Original) A computer system as recited in Claim 22 wherein said computer system comprises a personal digital assistant.
